

Declaration of Unity and Synthesis

unity (n.) oneness; agreement

synthesis (n.) the putting together of parts to form a whole

I, _____, citizen of Earth, believe
(your name here)

that all Life on this planet exists as one interdependent whole.
Understanding this, I declare that it is both my right and my desire to
live in peace, unity and synthesis with all other living Beings.
To this end:

I will accept and respect all people as my brothers and sisters,
equal and loved as children of the Divine Creator and having
unique talents and gifts to enrich the world.

I will treat Mother Earth and all her creatures with love,
respect, gratitude and reverence.

I will be a vessel for the energies of peace, unity and synthesis
and will extend love to all I meet.

I will use my talents in some concrete way to work for the
betterment of the entire human race and this living planet
which I call my home.
